Question 1: Basic Concept

Q: Which law states that the total current entering a junction equals the total current leaving the junction?

a) Ohm's Law

b) Kirchhoff's Current Law

c) Kirchhoff's Voltage Law

d) Thevenin's Theorem

Answer: b) Kirchhoff's Current Law

Explanation: Kirchhoff's Current Law (KCL) is based on the conservation of charge and states that the algebraic sum of currents entering a junction (node) equals zero, which can be interpreted as the total current entering equals the total leaving. This is fundamental in network analysis.
