Sample Exam Questions and Detailed Solutions

Below, we explore typical CLA1503 exam questions, providing step-by-step solutions and explanations.

Question 1: Analyze the use of metaphor in the given text excerpt

Sample Text Excerpt:

"Time is a thief that steals our moments before we realize it."

Solution Approach:

- Identify the metaphor:

The phrase "Time is a thief" directly compares time to a thief, suggesting that time takes away moments in a way similar to how a thief steals possessions.

- Explain the implication:

The metaphor emphasizes the intangible yet impactful nature of time?it's not a literal thief, but it "steals" moments from our lives silently and irreversibly.

- Discuss the effectiveness:

- The metaphor creates a vivid image, evoking feelings of loss and urgency.
- It personalizes the abstract concept of time, making it relatable.

- Additional analysis:

- The phrase "before we realize it" highlights the fleeting nature of time and human tendency to underestimate its passage.

Complete Answer:

The metaphor "Time is a thief" effectively personifies time as an entity capable of stealing, which underscores the transient nature of life. This comparison creates a vivid image that enhances the reader's understanding of how quickly moments pass, often unnoticed until it's too late. The phrase "steals our moments before we realize it" emphasizes the stealthy and inevitable loss associated with time. Overall, the metaphor powerfully conveys the importance of valuing and making the most of our time.

Question 2: Critically evaluate the argument presented in the short essay about language preservation

Sample Prompt:

"Language preservation is essential for maintaining cultural diversity, but it should not hinder the evolution of language."

Solution Approach:

- Restate the argument's main point:

The importance of preserving languages to sustain cultural diversity, balanced against the need for language to evolve naturally.

- Identify supporting points:

- Cultural identity is tied to language
- Preserving endangered languages protects heritage
- Language evolution reflects societal changes and innovation

- Critique the argument:

- Acknowledge the value of preservation efforts (e.g., language revitalization programs)
- Discuss potential conflicts (e.g., rigid preservation may impede natural language change)
- Highlight the importance of a balanced approach that allows language to adapt while safeguarding cultural roots

- Conclude with a nuanced view:

- Support preservation initiatives that respect linguistic diversity
- Encourage adaptive language policies that accommodate change

Sample Critical Evaluation:

The argument rightly emphasizes that language preservation is fundamental to maintaining cultural diversity, as language encapsulates unique traditions, histories, and worldviews. Efforts to preserve endangered languages are vital for cultural identity and diversity. However, insisting on static language forms can be counterproductive, as languages are inherently dynamic and evolve over time through societal interactions. Therefore, a balanced approach is necessary—one that values preservation but also accepts natural linguistic change. Preservation initiatives should focus on safeguarding core aspects of languages while allowing for adaptation, ensuring languages remain vibrant and relevant.

Question 3: Apply grammatical rules to correct the following sentence:

"He don?t know the answer to the question."

Solution:

- Identify the grammatical error:

The verb "don?t" is incorrect for the third person singular subject "He."

- Correct the verb form:

The proper conjugation is "doesn't" (does not).

- Revised sentence:

"He doesn't know the answer to the question."

Explanation:

In English grammar, the auxiliary verb "do" conjugates as "does" in the third person singular, and the negative form is "doesn't." Therefore, the correct sentence is "He doesn't know the answer to the question."

Sample Questions and Detailed Solutions from FAC 1502 Nov 2013

Question 1: Recording a Transaction

On 1st November 2013, XYZ Ltd purchased office equipment costing \$10,000. The equipment has an estimated useful life of 5 years with no residual value. Prepare the journal entry to record this transaction and calculate the depreciation expense for the first year using straight-line depreciation.

Solution:

Journal Entry:

``plaintext

Date: 1st November 2013

Debit: Office Equipment \$10,000

Credit: Cash / Bank \$10,000

``

Depreciation Calculation:

- Cost of equipment: \$10,000
- Useful life: 5 years
- Residual value: \$0
- Depreciation expense per year = $(\text{Cost} - \text{Residual value}) / \text{Useful life} = \$10,000 / 5 = \$2,000$

Depreciation for first year (Nov 2013 - Oct 2014):

Since the equipment was purchased on November 1, depreciation should be calculated for 12 months.

Annual depreciation: \$2,000

Monthly depreciation: $\$2,000 / 12 = \166.67

Depreciation expense for first year:

- For 12 months: $\$166.67 \times 12 = \$2,000$

Adjusting entry at year-end (assuming December year-end):

``plaintext

Debit: Depreciation Expense \$2,000

Credit: Accumulated Depreciation \$2,000

...

Note: If the question specified a different year-end date, depreciation would be prorated accordingly.

Question 2: Preparing Financial Statements

Given the following trial balance of ABC Ltd as at 31 December 2013, prepare the Income Statement and the Balance Sheet.

| Account | Debit (\$) | Credit (\$) |

|---|---|---|

| Cash | 5,000 | |

| Accounts Receivable | 8,000 | |

| Inventory | 12,000 | |

| Equipment | 20,000 | |

| Accumulated Depreciation | | 4,000 |

| Accounts Payable | | 6,000 |

| Capital | | 30,000 |

| Revenue | | 50,000 |

| Expenses | | 20,000 |

Solution:

Step 1: Prepare the Income Statement

- Revenues: \$50,000
- Expenses: \$20,000

Net Income: $\$50,000 - \$20,000 = \$30,000$

Step 2: Prepare the Balance Sheet

Assets:

- Cash: \$5,000
- Accounts Receivable: \$8,000
- Inventory: \$12,000
- Equipment: \$20,000
- Less: Accumulated Depreciation: \$4,000

Net Equipment: $\$20,000 - \$4,000 = \$16,000$

Total Assets: $\$5,000 + \$8,000 + \$12,000 + \$16,000 = \$41,000$

Liabilities and Equity:

- Accounts Payable: \$6,000
- Capital: \$30,000
- Add: Net Income for the year: \$30,000

Total Equity: $\$30,000 + \$30,000 = \$60,000$

Total Liabilities and Equity: $\$6,000 + \$60,000 = \$66,000$

Note: The discrepancy suggests the trial balance is incomplete or simplified; in real scenarios, assets must equal liabilities plus equity. For illustrative purposes, details can be adjusted accordingly.

Question 3: Inventory Valuation Method

Explain the differences between FIFO and Weighted Average Cost methods in inventory valuation, and discuss their impact on financial statements during periods of rising prices.

Solution:

FIFO (First-In, First-Out):

- Assumes the oldest inventory items are sold first.
- Ending inventory consists of the most recent purchases.
- During rising prices, FIFO results in:
 - Lower cost of goods sold (COGS)
 - Higher gross profit
 - Higher net income
 - Higher ending inventory value

Weighted Average Cost:

- Calculates an average cost per unit by dividing total cost of goods available for sale by total units.
 - Each sale is assigned this average cost.
 - During rising prices:
 - COGS and ending inventory values are moderate, lying between FIFO and LIFO results.
 - Provides smoother profit figures over periods.

Impact on Financial Statements:

- FIFO inflates profits during inflationary periods, potentially leading to higher taxes.
- Weighted average offers a middle ground, reducing earnings volatility.
