ISO standards specify a set of line types for various purposes:

- Visible Lines: Thick, continuous lines outlining visible edges.
- Hidden Lines: Dashed lines indicating edges not visible in the current view.

- Center Lines: Thin, alternating long and short dashes, indicating symmetry axes or circular features.
- Section Lines: Hatching patterns used to indicate cut surfaces.
- Cutting Plane Lines: Lines showing where the object is sectioned.

- Dimensioning and Tolerancing

Proper dimensioning ensures accurate manufacturing and inspection.

ISO Dimensioning Standards:

- Placement: Dimensions are placed outside the object views, with extension lines leading to the features.
- Units: Typically millimeters, but can vary based on project requirements.
- Tolerances: Indicate permissible deviations, critical for ensuring fit and function.
- Datum References: Establishing reference points for measurements.

- Annotations and Symbols

ISO standards define standard symbols for features like welds, surface finishes, threads, and more.

Common Symbols Include:

- Welding Symbols
- Surface Finish Symbols
- Thread Symbols
- Geometric Dimensioning and Tolerancing (GD&T) Symbols

Proper annotation enriches the clarity of drawings, reducing misinterpretation.

- Notes and Remarks Section

This area provides additional instructions, special handling notes, or references to standards, materials, or processes.
