Question What are the key Kahramaa specifications for oil type transformers? Kahramaa specifies that oil type transformers must adhere to standards related to insulation oil quality, cooling system efficiency, and safety features, including compliance with QCS (Qatar Construction Specifications) and international standards like IEC 60076. Are there specific oil quality requirements mandated by Kahramaa for transformers? Yes, Kahramaa requires transformer oils to meet purity standards such as low moisture content, high dielectric strength, and absence of sludge or contaminants, often aligned with IEC 60296 or ASTM D3487 standards. What cooling methods are approved under Kahramaa for oil type transformers? Kahramaa approves cooling methods such as ONAN (Oil Natural Air Natural), ONAF (Oil Natural Air Forced), and ONAF (Oil Natural Air Forced), depending on transformer capacity and application, ensuring efficient heat dissipation. Are there specific testing and certification requirements for oil type transformers per Kahramaa? Yes, transformers must undergo routine and type tests including insulation resistance, transformer turns ratio, dielectric tests, and oil quality analysis, with certifications from accredited laboratories demonstrating compliance. Does Kahramaa specify any environmental or safety standards for oil type transformers? Absolutely, Kahramaa mandates that transformers use environmentally friendly, biodegradable oils where possible, and include safety features like breather filters and oil leakage detection systems to prevent environmental hazards. What are the maintenance and testing intervals for oil type transformers as per Kahramaa? Kahramaa recommends regular maintenance including oil sampling and testing every 6 to 12 months, along with routine inspections for oil leaks,

cooling system operation, and insulation condition to ensure optimal performance. Are there any specific documentation or approval processes required by Kahramaa before installing an oil type transformer? Yes, vendors must submit detailed technical specifications, test reports, and certification documents for approval by Kahramaa before installation, ensuring compliance with local standards and safety regulations.
